4-H Photography Monday Week 1 Challenge

Composition

Practice taking photos with a well-defined subject.

The subject is the most important part of the photo and should be immediately recognizable.

Practice getting close to your subject to fill the frame and get rid of distractions and empty space.

- Move yourself
- Move the subject
- Use the zoom on your camera

Try taking photos with different perspectives such as:

- o Eye level (for people and animals)
- o Bird's eye view
- o Bug's eye view

Questions to think about:

What were some of the different perspectives you chose for your photos?
What is the hardest part about getting photos from different perspectives?
What are some other situations where looking at something from a different point of view may make a difference?
